Journal of Testing and Evaluation
Table of Contents
Volume 27, 1999

No. 1, January

Validation of a Corona Discharge Technique to Test Male Latex Condoms for Pinhole Defects—BRUCE A. HERMAN AND RONALD F. CAREY 3

Probabilistic Model for the Analysis of Dynamic Cone Penetrometer Test Values in Pavement Structure Evaluation—MICHAEL DIVINSKY AND MOSHE LIVNEH 7

Cyclic Response and Fatigue of Steels Subjected to Strain Control with Non-Zero Means—YI GONG AND MICHAEL NORTON 15

Extrapolation of Creep Strain Data for Pure Copper—R. SANDSTRÖM 31

Loss Energy of Composite Materials. Part II: Impact Loading—ANDRZEJ K. BLEDZKI, JOCHEN GASSAN, AND ANDREAS KESSLER 36

The Influence of Irregularities in the Crack Shape on the Crack Extension Measurement by Means of the Direct-Current-Potential-Drop Method—F. O. RIEMELMOSER, R. PIPPAN, H. WEINHANDL, AND O. KOLEDNIK 42

Effect of Asphalt Mix Design Method on Binder and Gradation Selection—JORGE B. SOUSA, MANUEL PRATES, RUI BARROS, PIERRE LANGLOIS, ANNE MARIE LECIERC, AND BOB BRIGGS 47

Automatic Field Permeameter for Drainage Properties of Porous Asphalt Mixes—SIEW ANN TAN, TIEN FANG FWA, AND CHIP TIONG CHUAI 57

Technical Note: Modeling Considerations in Wood-Related Research—PATRICK J. PELLICANE 63

Technical Note: Stress-Strain Behavior of a Fe-Ni-Cr Alloy During In- and Out-Of-Phase Synchronized Thermal Cycling and Mechanical Cycling Tests—QINGFU HE, J. BRESSERS, E. FENSKE, AND R. DECAT 69

Technical Note: California Bearing Ratio Test Simplified—N. S. PANDIAN, A. SRIDHARAN, AND P. S. R. N. RAJU 72

Testing Forum: Repeatability and Reproducibility in Walkway-Safety Tribometry: Abrasive-Grit Size in Test-Foot Preparation—ANN FENDLEY, MARK I. MARPET, HOWARD MADOFF, AND DAN SCHUTTER 76

No. 2, March

Observation of the Propagation of Plastic Strain in HSLA 80 Steel—M. L. DU AND F. P. CHIANG 85

Charpy Impact Verification Data (1994–1996): A Summary—C. N. MCCOWAN, C. M. WANG, AND D. P. VIGLIOTTI 89

Effect of Austempering Variables on the Quasi-Static and Dynamic Fracture Toughness of Austempered Ductile Iron—MALUR N. SRINIVASAN AND SHINICHIRO KOMATSU 100

Experimental System for Simulating Crack Propagation in Asphalt Pavements and Effectiveness of Geosynthetics in Crack Retardation—DIMITRIOS G. GOULIAS AND ILAN ISHAI 106

Ultrasonic Signal-Transmission Techniques for Compact Microtunneling Systems—KATSUHIKO HONJOH, KUNIO HOSHIYA, SADAHIKO NAKANO, AND HIROKI KUWANO 114

Estimation with a Few Strain Gages of Stress Fields near a Notch Root of Actual Structures Under In-Plane Loading—TOYOMITSU HARADA AND HIROSHI NOGUCHI 122

Data Supporting a Provisional American Society for Testing and Materials (ASTM) Method for Metalworking Fluids, Part 2: Preliminary Report of Evaluation of a Ternary Solvent Blend in a Provisional ASTM Method for Metalworking Fluids (P-42-97)—ROBERT A. GLASER, STANLEY SHULMAN, AND PATRICIA KLINGER 131

Failure Analysis Using Microfocus X-ray Imaging—RICHARD H. BOSSI 137

A CTOD Approach to Predicting Crack Extensions in Aluminum Alloys—INHOY GU 143

Third ASTM Symposium on Exterior Insulation and Finish Systems: Decay of Wood and Wood-Based Products Above Ground in Buildings—CHARLES G. CARLL AND TERRY L. HIGHLEY 150

Third ASTM Symposium on Exterior Insulation and Finish Systems: EIFS Sealant Joint Restoration—KENNETH F. YAROSH 159

Technical Note: Ultrasonic Measurement of the Dynamic Elastic Moduli of Small Metal Samples—J. A. SLOTWINSKI AND G. V. BLESSING 164

Technical Note: A Back-Faced Strain Compliance Expression for the Compact Tension Specimen—WILLIAM T. RIDDELL AND ROBERT S. PIASCIK 167

Technical Note: Data Supporting a Provisional American Society for Testing and Materials (ASTM) Method for Metalworking Fluids, Part I: A Solvent Blend with Wide-Ranging Ability to Dissolve Metalworking Fluids—ROBERT A. GLASER 171

No. 3, May

A Simple Catapult System for Studying the Small Projectile Impact Resistance of Various Glass Laminates—PAUL V. GRANT AND WESLEY J. CANTWELL 177

The Role of Bearing Plates in the Five-Point Bending Tests of Structural-Size Lumber—ROBERT J. LEICHTI AND TONGCHATE NAKHATA 183

Evaluation of Wood Poles Using a Free Vibration Technique—Y. H. CHUI, D. W. BARCLAY, AND P. A. COOPER 191

Further Evaluation of Automated Stress Corrosion Ring (ASCOR) Testing of Aluminum Alloys—L. SCHRA AND R. J. H. WANHILL 196

Precision in the Extrapolation of Creep Rupture Data—ROLF SANDSTRÖM AND LARS LINDÉ 203

On the Determination of J_{IC} Using the Stretch Zone Width Method—R. K. V. SURESH, N. RAMAKRISHNAN, M. SRINIVAS, AND P. RAMARAO 211

Water Management and Moisture Transport in Direct-Applied and EIFS Wall Assemblies—TIMOTHY D. TONYAN, KEVIN W. MOYER, AND WILLIAM C. BROWN 219

Technical Note: Ability of a Viral Penetration Test (ASTM F 1671-95) to Detect Small Holes—C. DAVID LYTLE AND KAREN H. BAKER 231

Technical Note: Effect of Construction Adhesive and Joist Variability on the Deflection Behavior of Industrial Wood Floors—PATRICK J. PELLICANE AND GEOFFREY ROBINSON 234

Technical Note: A New Gripping Technique for Small Metal Specimens—D. A. LA VAN, P. B. DUNCAN, H. ZENG, AND W. N. SHARPE, JR. 243

No. 4, July

A New Dynamic Wind Load Cycle to Evaluate Mechanically Attached Flexible Membrane Roofs—APPUPILLAI BASKARAN, YEN CHEN, AND USA VILAIPORNSAWAI 249

Analysis of Stresses in Spur Gears by the Photoelastic Coating Method—MEHMET ÇELIK AND ÖMER G. BILIR 266

Effect of Heat Treatment on Mechanical Properties and Surface Roughness of Aluminum Alloy 601—FREDERICK F. FROST AND VISHY KARRI 273

Development and Evaluation of a Biaxial Tensile Tester for Fabrics—TUSHAR K. GHOSH 282

Evaluating the Quality of a Mechanical Testing System Using Displacement Field Contours—BING ZHAO AND ANAND ASUNDI 290

Comparison of Returnable Paper and Plastic Corrugated Packaging Trays for the United States Postal Service—S. PAUL SINGH, RALPH WALKER, AND DON CLOSE 296

Technical Note: A Low-Temperature Modification to the Charpy Impact Test, with an Example Study of the Fracture Toughness of Mg-12%Li between 4.2 to 77 K—A. M. RUSSELL AND J. E. OSTENSON 301

Technical Note: A Method to Determine the Transition Point of Fatigue Crack Growth Rate from Near-ΔK_{th} to Paris Regions—JUNHUA ZHENG AND BRIAN E. POWELL 304

No. 5, September

Comparison of Finite Element Results and Experimental Measurements of CTOD δ_5 in CT Specimens—GENNADIY P. NIKISHKOV, JÜRGEN HEERENS, AND DIETER HELLMANN 307

Effect of Crack Front Curvature and Side Grooving on CTOD δ_5 and *J*-Integral in CT and 3PB Specimens—GENNADIY P. NIKISHKOV, JÜRGEN HEERENS, AND DIETER HELLMANN 312

Prediction of Permanent Deformation of Asphalt Concrete in Cyclic and Monotonic Loading—D. V. RAMSAMOOJ AND J. RAMADAN 320

Yield of Inconel 718 by Axial-Torsional Loading at Temperatures up to 649°C—CHRISTOPHER M. GIL, CLIFF J. LISSENDEN, AND BRADLEY A. LERCH 327

Permeability and Consolidation Behavior of Fly Ashes—N. S. PANDIAN AND S. BALASUBRAMONIAN 337

Prediction of Fatigue Performance of Asphalt Concrete Mixes—D. V. RAMSAMOOJ 343

Instability of Stacked Pallet Loads Due to Misalignment—S. PAUL SINGH 349

No. 6, November

Interlaboratory "Pilot Run" Study of Small Heat-Flow-Meter Apparatus for ASTM C 513—R. R. ZARR AND E. S. LAGERGREN 357

Repeatability and Bias of Two Walkway Safety Tribometers—C. M. POWERS, K. KULIG, J. FLYNN, AND J. R. BRAULT 368

On the Application of the Indirect Compliance Measurement Technique to Flexure Specimens Containing a Chevron Notch—G. R. SARRAFI-NOUR AND T. W. COYLE 375

Effects of Silica Fume and Steel Fibers on Some Mechanical Properties of High-Strength Fiber-Reinforced Concrete—Ö. EREN, K. MARAR, AND T. ÇELIK 380

The Effect of Kinematic Viscosity on the Flash Point of Liquids Determined by ASTM 93 Procedure A, ASTM D 93 Procedure B, and ASTM D 56—R. G. MONTEMAYOR 388

Environmental Degradation of Natural Rubber Latex Gloves: The Effects of Elevated Temperature on Tensile Strength—D. L. WALSH, D. J. CHWIRUT, AND R. M. KOTZ 398

A Methodology for Determining Rate-Dependent Flow Surfaces for Inconel 718—C. J. LISSENDEN, C. M. GIL, AND B. A. LERCH 402

General Constitutive Relations of Anorthotropic 6061-T6 Aluminum and Its Fatigue Life under Proportional and Non-Proportional Loadings—H. NAYEB-HASHEMI AND H. LIN 412

Reference Verification Fluids for Flash Point Determination—R. G. MONTEMAYOR, J. E. ROGERSON, J. C. COLBERT, AND S. B. SCHILLER 423

Early Detection of Fatigue Damage through Ultrasonic Non-Destructive Evaluation—Part I: Theory—PERES BAYER, AMOS NOTES, AND LIVIU SINGHER 428

Early Detection of Fatigue Damage through Ultrasonic Non-Destructive Evaluation—Part II: Experimental—PERES BAYER, LIVIU SINGHER, AND AMOS NOTEA 432
